Lately, I've been a traveling Board Certified Safety Professional (CSP) with over 25 years of experience overseeing comprehensive safety protocols and operational excellence across heavy civil, maritime, and mission-critical infrastructure. Proven record in high-stakes EM 385 environments including USACE/DoD/NAVFAC facilities, maritime environments, oil and gas drilling, roads/bridges/tunnels, pharmaceuticals, and large-scale renewable energy projects. Although I specialize in shorter-term, remote-area site locations, I am open to assist you wherever I'm needed.
